AVAILABLE NOW:

SAINE REPERTORY

The Groundbreaking Addition To Your Homeopathic Software

More than 150,000 entries

The Saine Repertory - originally developed by the MMPP group to enhance the Complete Repertory 4.5 (CR 4.5) and limited to its users - is now available for almost all computer repertories.

Absolutely reliable

With the addition of the Saine Repertory to your repertory program, the materia medica of all remedies updated by the MMPP in their monographs will be perfectly reflected and thus your homeopathic practice and patient care will be improved significantly.

Materia Medica Pura Project

The MMPP's efforts involve reproofing old remedies and proving new ones. A monograph for each researched remedy is created including all characteristic symptoms (genius) that are subsequently integrated into the Saine Repertory in the form of new entries, changes of remedy grading, corrections of rubric wording and creation of new rubrics and sub-rubrics.

The webinar recording will
be available for 3 months.
